PROFESSIONAL SUMMARY

Data Analyst with 4+ years of experience using data to investigate revenue, customer, risk, and operational problems. Builds ETL pipelines, relational data models, and executive dashboards, with hands-on experience analyzing datasets containing millions of records. Uses BI tools, statistical analysis, customer segmentation, hypothesis testing, and forecasting to measure performance, find the factors driving results, detect problems, and provide evidence-based recommendations for business decisions.

CORE TECHNICAL SKILLS

Analytics & Statistics: SQL, Python, R, hypothesis testing, linear and logistic regression

Business Intelligence: Power BI (DAX, Power Query), Excel, Tableau, Looker Studio, executive dashboard design, KPI reporting

Data Management: ETL, relational data modeling, dimensional modeling, data validation, data quality, QA testing, PostgreSQL, MySQL, Git/GitHub

Modern Data Platforms: Microsoft Fabric, Azure Data Factory, semantic models

Business Analysis: KPI definition, business process mapping, requirements analysis, analytical reporting

PROFESSIONAL EXPERIENCE

Data Analyst / BI Consultant

Jun 2025 – Present

Freelance / Consulting.

- Combined customer, sales, and operational records across five businesses, replacing manual data entry and giving teams one reliable source for daily business reporting.
- Set up and improved customer management systems, including customer records, sales stages, follow-ups, and automated reminders, reducing manual data entry by 50%.
- Analyzed customer activity and purchase history to identify inactive, returning, and high-value customers, supporting changes that contributed to a 25% improvement in customer retention.
- Built automated reports and dashboards showing sales, customer activity, revenue, and other agreed business measures, reducing the need to prepare reports manually.
- Documented how customer and sales information was collected, updated, checked, and reported, making it easier for teams to follow the same process consistently.

Data Analyst, Risk & Security Intelligence

Feb 2025 – May 2025

Risk Control Services, Lagos, Nigeria

- Combined and cleaned data from internal databases and SharePoint, reducing data errors by 40% and cutting processing time by 30%.
- Coordinated a 5-member team handling data requests and client reports, reducing project turnaround time by 35%.
- Built management dashboards and KPI reports showing security incidents, risk levels, and changes in key security measures for senior management.
- Examined 300,000+ security records to identify unusual activity and recurring risk patterns, improving threat-detection precision by 25%.

Data Analyst

2023 - 2024

Instinct Hub, Lagos, Nigeria

- Analyzed customer activity and account history to identify customers likely to stop using the service, reducing manual customer tracking time by 20%.
- Built automated reports that reduced the time required to prepare recurring reports and contributed to a 15% improvement in team efficiency.
- Delivered six analytics workshops for 8+ analysts, covering data cleaning, analysis, reporting, and chart design, contributing to a 28% improvement in reporting accuracy.
- Mentored eight junior analysts on SQL, Python, and data visualization, reviewing their work and correcting errors in queries, analysis, and reports.

Business/Data Analyst

2022 - 2023

Adullam Technologies Limited, Lagos, Nigeria

- Reviewed stock levels and sales records to identify products with excess inventory, helping reduce overstock by 15%.
- Analyzed customer purchase records to group customers by buying frequency and spending, supporting targeted marketing that increased customer loyalty by 25%.
- Documented sales, inventory, and customer processes from start to finish, identifying duplicated steps, missing procedures, and points where work was being delayed.

PROJECTS

GlobalCart Enterprise Customer Intelligence & RFM Analytics Platform

Analyzed 100,000 customers, 500,000 orders, and 1.5 million order items to identify high-value, loyal, declining, and inactive customers. Measured purchase frequency, spending, recency, repeat-purchase patterns, and revenue by customer group, then built a two-page Power BI dashboard to help identify customers worth retaining and segments showing declining activity.

B2B SaaS Customer & Revenue Analytics Platform

Analyzed 2.58 million records across 10 tables to understand revenue, retention, churn, customer cohorts, and changes in customer behavior. Developed 105 SQL queries and 50 statistical analyses to measure revenue trends, test business assumptions, identify churn patterns, and compare cohort performance.

CRM Data Quality & Governance Platform

Reviewed 5,130 CRM records to identify incomplete, inconsistent, duplicate, and unreliable customer data. Built an Excel and Power Query validation system that scored records against defined quality checks, flagged exceptions, and produced a structured review report for targeted data correction and cleanup.

WeatherIntel: Global Weather Analytics & Forecasting Platform

Analyzed 371,482 weather observations across 8 international stations to identify temperature trends, seasonal patterns, and forecasting accuracy. Compared four forecasting approaches and found XGBoost produced the lowest recorded error, with 2.22°C MAE and 2.80°C RMSE, then presented the findings through a Power BI dashboard.

EDUCATION

B.Sc. in Statistics, University of Lagos, Nigeria, 2021

CERTIFICATIONS

- IBM Data Science Professional Certificate, 2024
- Scrum Business Analysis Certification, 2024
- Google Data Analytics Professional Certificate, 2023
- Forage Data Analytics Consulting Program, 2023
